

1. Create "SOP" directory in your home directory.
2. Go to "SOP" directory and create "Class1" directory.
3. Go back to your home directory and directly, with one command, go to the "Class1" directory.
4. Create two files, "File1.txt" and "File2.txt".
5. Change the permissions of the "File2.txt" file to read and execute. Check if permissions have been changed.
6. Go to your home directory and list all directories together with their content.
7. Check the manual of the nano and cat commands. Then write to file "File1.txt" text "Hello Linux", then display it.
8. Add at least 15 lines of text to file "File1.txt".
9. Display sorted content of the file "File1.txt".
10. Display first 4 lines of the file "File1.txt".
11. Display last 3 lines of the file "File1.txt".
12. Count number of words in the file "File1.txt".
13. Count number of characters in the file "File1.txt".
